

## The DTI Global 800 Number

For business and personal use, 800 numbers are the way to go.

For business or personal use, DTI has introduced the Global 800 service, from over 22 countries and territories, using toll-free lines.

How does it work? You simply dial a toll-free number from one of the 22 countries and territories under the Global 800 system and, when prompted, enters a special PIN (personal identification number). You are then automatically linked to a specific, pre-programmed telephone number anywhere in the world.

Who can use the Global 800 number?

- Business people - when traveling around the world, one can stay in touch with the office, toll-free (no calling cards, no prepaid cards, no hassles)
- Potential Clients - Make it easy for your clients to stay in touch with you, where ever you, or they, are. Simply provide them with the toll-free access for the country they are in, plus the PIN, and they can call you, your customer service department, or anyone for which you have set up a Global 800 access.
- International Promotions - make it easy for your marketing department to expand/conduct promotions around the world, by linking advertisements to a Global 800 termination to answer questions and/or sign-up new customers/clients for your services and products.
- Families - if you travel internationally, make it easy to call home, with DTI's international toll-free numbers and your Global 800 PIN, just pick up the phone and dial.

For information or to sign up, call now, using the toll-free Customer Service Number, below, or email [CustomerSvc@dialthru.com](mailto:CustomerSvc@dialthru.com).
